Nuova gamma di attacchi per le scale a pioli, conformi alla norma UNI EN 795/12 di TIPO A. Studiati dai Tecnici SEKURE per superare il margine superiore della linea di gronda, composto da due elementi: uno da fissare alla struttura e l'altro regolabile in altezza e munito di cordino di sicurezza.

La gamma si arricchisce del dispositivo compatibile con lamiera o pannello sandwich di tutte le tipologie e del nuovo attacco a parete. Terminali disponibili in RAL 8017 Testa di Moro o RAL 9006. Dispositivo dall'impatto visivo contenuto e dal piacevole design
